

PIRATE

SECTIE TOXICOLOGIE

Primary survey

ABCDE & initial therapy

Investigation & Identification

ECG, laboratory investigation, bloodgas, toxicology screening, levels

Toxidromes, history

Risk assessment

Agent (IR, MR, SR), dose, timing, clinical features, patient features (AMPLE, gewicht)

ADME

Absorption ↓: Gastric lavage, SDAC, MDAC, whole bowel irrigation, endoscopic removal

Distribution ↓: NaBic for TCA, Fab-fragments for digoxine

Metabolism Δ: Ethanol for toxic alcohol, NAC for paracetamol

Elimination ↑: Nabic for salicylates, hemodialysis/hemoperfusion

Therapie & Traject

Resuscitation, antidote, monitoring, supportive, specific and complication

Evaluation

Disposition, time for observation, psychiatric evaluation, kindcheck, restart prescription
